# FICTION

## The ugliest anglerfish ever

Original title: **Самый некрасивый удильщик в мире**  
Author: Kate Reed  
Illustrator: Lala Vaganova  
Age: **3-6**  
Category: **fiction**  
Format: **hardcover**  
ISBN: 978-5-905447-03-7  
42 pages  
215x280mm  
Pub. date: sept 2014

This is the story of an exceptionally ugly anglerfish, who lives a lonely life at the bottom of the deepest ocean. One day he travels up to meet the new world of light and other fish — just to find out that nobody wants to be friends with him. His ugliness becomes the top joke of the day. However the fish will soon learn, to their big surprise, that the angler has some extraordinary skills, which they need, very much indeed.

## Elephant's eleven dreams

Original title: **Саннани и его сны**  
Author: Kate Reed  
Illustrator: Lala Vaganova  
Age: **3-6**  
Category: **fiction**  
Format: **hardcover**  
ISBN: 978-5-905447-26-6  
60 pages  
215x280mm  
Pub. date: sept 2017

This story based on a real natural phenomenon of desert elephants, living at the **Skeleton coast** in the biggest desert on earth — Namib.

Travelling through the desert elephant survives severe natural conditions and meets several extraordinary creatures, which inspire him to become stronger, wiser and resilient. They are: endemic black bug, gecko, Faidherbia albida tree, chacma baboon, broken steamship Eduard Bohlen filled with sand, Welwitschia plant, african viper, Roaring dunes and others. Each of them shows some unusual skills and helps an elephant to interpret one of his dreams. But the last eleventh dream still remains a mystery. The riddle being unraveled when he meets his family — phenomenal desert elephants of Skeleton coast.

Book provided with real map of featured part of Namib desert and non-fictional comments about real life animals, object and plants, mentioned in the story.

6 spreads  
166x166mm  
Pub. date: sept 2012

This book is about simple geometrical forms found in nature. Each spread is dedicated to one of geometrical form and contains 4 sliders with additional illustrations. Analyze the picture and find more natural objects of one of the geometrical forms.

Our books are based on nature observation, natural object properties. Educating elements designed under Maria Montessori and Julia Hippenreiter methods. Books combine information about nature, learning with game elements and interaction. You can read them, watch and play with them.

Children are talented, wise, observant, searching and thankful readers. They are our teachers, critics and advisers. Children always take part in books development, test graphics and interactive elements. We hope our books will help children and their parents to learn new and will inspire to investigate our beautiful and endless world.
